Abstracts

The global Gaming Mouses market size is expected to reach \$ 2197 million by 2032, rising at a market growth of 6.4% CAGR during the forecast period (2026-2032).

A gaming mouse is a computer input device optimized for gaming scenarios, typically featuring high-performance optical sensors, low-latency connectivity, programmable buttons, lightweight structures, and software-based customization. Compared with standard PC mice, gaming mice place greater emphasis on tracking precision, response speed, ergonomics, and durability for FPS, MOBA, MMO, and general e-sports applications. In 2025, Global gaming mouse sales are estimated at 54 million units, with an average ex-works price of 26 US\$/Unit and global capacity is about 82 million units per year, with a gross margin range of 18%-32%.

The gaming mouse market is mainly driven by the continued expansion of PC gaming and e-sports, together with users' increasing willingness to pay for lighter, faster, and more precise peripherals. Official product pages from major brands consistently emphasize high-DPI optical sensors, high polling rates, wireless low-latency performance, and ergonomic specialization, showing that the category is increasingly differentiated by competitive gaming needs rather than by simple mouse replacement demand.

This report studies the global Gaming Mouses production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Gaming Mouses and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and

competition, as well as details the characteristics of Gaming Mouses that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Gaming Mouses total production and demand, 2021-2032, (Million Units)

Global Gaming Mouses total production value, 2021-2032, (USD Million)

Global Gaming Mouses production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Million Units), (based on production site)
