The global Gantry Crane Wheel market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Gantry crane wheels feature high load-bearing capacity, stability, wear resistance, precise control, and safe design, which need to be determined based on specific crane requirements, working environment, and expected loads.

Gantry crane wheels are a key component that supports the movement of the gantry crane. They are installed on the rails at the bottom of the gantry to provide the machine's mobility and enable the crane to move smoothly along the rails in the horizontal direction. The gantry crane is a large mechanical equipment used for lifting and transporting heavy objects. The movement of the gantry crane mainly relies on the wheel system installed at its bottom.
