According to our (Global Info Research) latest study, the global Gapless Lightning Arrester market size was valued at US\$ 1765 million in 2024 and is forecast to a readjusted size of USD 2395 million by 2031 with a CAGR of 4.5% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

A Gapless Lightning Arrester is a modern surge arrester that does not use spark gaps to operate — it directly conducts surge currents through metal oxide varistors (MOVs) when an overvoltage occurs. In older lightning arresters, spark gaps were used to trigger conduction during a surge. But gapless designs are always connected, ready to react instantly without needing a spark to jump across a gap.
