Abstracts

The global Garage Fireproof Door market size is expected to reach \$ 1529 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

In 2025, global production of garage fireproof doors reached 2.07 million units, with an average selling price of US\$511 per unit. Garage fireproof doors are door systems installed in underground garages, parking garages, industrial garages, repair shops, or large openings connecting to vehicle/equipment access routes, and certified to fire-resistant standards. They are not essentially ordinary garage doors, but rather serve as complete door components to provide fire-resistant separation for openings; these doors typically need to close automatically upon activation of fire alarms, detectors, or fusible links, and meet corresponding fire resistance, integrity, and, where necessary, smoke control requirements. Upstream components mainly include galvanized steel/stainless steel, fire-resistant filler materials or mineral wool, guide rails, rollers, drive motors, control boxes, interlocking release devices, detectors, seals, and surface coatings; downstream components connect to parking structures, commercial buildings, industrial plants, logistics warehouses, equipment partitions, and high-frequency vehicle access routes. Gross profit margin is approximately 30%-40%.

Globally, the Asia-Pacific region is currently a key market, driven by new construction and incremental growth, consistent with ongoing urbanization, industrial parks, logistics facilities, and infrastructure development. North America and Europe are more mature replacement markets. Future development trends for garage fireproof doors include: 1. Products are shifting from simply being fire-resistant to composite systems that integrate automatic closing, alarm linkage, smoke prevention, insulation, security, and compatibility with large openings; 2. Fire-resistant lift-up sectional doors are becoming an important supplement for large opening scenarios; 3. Increasing emphasis is placed

on annual inspections and maintenance compliance.
