According to our (Global Info Research) latest study, the global Garage Management System market size was valued at US\$ 586 million in 2025 and is forecast to a readjusted size of US\$ 904 million by 2032 with a CAGR of 6.7% during review period.

The Garage Management System is a software solution designed for independent repair shops, quick-service chains, tire centers, body and paint shops, and dealership service centers. It enables centralized management of appointment scheduling and vehicle intake, work orders, quotations and customer authorizations, technician scheduling, parts inventory and procurement, invoicing and payments, customer CRM, maintenance reminders, digital vehicle inspections, business reporting, and multi-location operations.

Garage management systems are transitioning from traditional on-premise software to cloud-based SaaS models that feature mobile vehicle intake, digital inspections, online quote authorization, and integrated payment processing. In Western markets, platforms such as Tekmetric, Shopmonkey, and AutoLeap emphasize integrated capabilities?combining end-to-end workshop workflows, payments, customer communication, and data analytics. Tekmetric reports that its cloud platform serves over 15,000 repair shops, while Shopmonkey positions itself as a comprehensive management solution covering invoicing, POS, CRM, inventory, and scheduling. Demand is primarily driven by the growing vehicle population, increasing electronic complexity in vehicles, the digital transformation of independent repair shops, the rise of chain operations, the shift of parts supply chains to online platforms, and changing customer habits regarding online communication and appointment scheduling.
