Abstracts

The global Garden Fountain market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A garden fountain is a landscape device, usually composed of a water pump, a pool, a water pipe, and a fountain head. The water is pumped to the fountain head through the water pump, and the water is sprayed from the fountain head to form various fountain effects, such as fountains, sprays, waterfalls, etc., adding a beautiful landscape effect to the garden. In addition to the beautiful effect, the fountain can also play the role of increasing air humidity, purifying the air, alleviating the heat island effect, etc., and helping to create a comfortable ecological environment.
