According to our (Global Info Research) latest study, the global Gas Grills market size was valued at US\$ 5221 million in 2025 and is forecast to a readjusted size of US\$ 7092 million by 2032 with a CAGR of 4.4% during review period.

The gas grill is a device that cooks food by applying heat from below. There are several varieties of gas grills, with most falling into one of two categories: gas-fueled or charcoal. It is a kind of barbecues that use gas to heat. It can help you to create delicious gourmet food outdoors, delivering the authentic barbecue taste with complete convenience.

Key Driving Factors:

1. **Changing Lifestyles:** Consumers are increasingly combining outdoor recreation, family gatherings, and other social activities with high-quality cooking experiences, directly stimulating demand for gas ovens. Investing in backyard renovations and creating 'outdoor kitchens' is also prevalent in North America and Europe.
2. **Convenience and Health Needs:** Compared to charcoal ovens, gas ovens ignite quickly, offer precise temperature control, and are easy to clean, perfectly catering to consumers' desire for 'easy' cooking in a fast-paced lifestyle. Meanwhile, 'healthier' cooking methods (such as reduced fat intake and smoke emissions) are also a significant market driver.
3. **Economic and Urbanization Factors:** Globally, especially in emerging markets, rising disposable incomes have enabled households to purchase higher-quality, more expensive high-end ovens. Simultaneously, urbanization and Western dietary habits

(particularly in the Asia-Pacific region) have brought a large influx of new users to the market.
