Abstracts

The global Gas Nail Gun market size is expected to reach \$ 356 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

A gas nail gun, also known as a gas-powered nail gun or a cordless gas nailer, is a type of power tool used in construction and woodworking for driving nails into various materials, such as wood, concrete, or steel, with the assistance of compressed gas. These tools are designed to be portable, efficient, and suitable for a wide range of fastening applications, both in indoor and outdoor settings. In 2025, global Gas Nail Gun production reached approximately 1713 k units, with an average global market price of around 150 US\$/Unit. The production capacity of Gas Nail Gun reaches 2200 k units, and the industry's gross profit margin is approximately between 20% and 40%.

The market demand for gas nail guns continues to grow, primarily driven by multiple factors, including the accelerated advancement of industrialized and prefabricated construction, increased reliance on portable and efficient fastening tools in high-altitude and outdoor work scenarios without power, limitations on space and mobility of traditional pneumatic equipment due to the need for air compressors, the continuous maturation of gas-powered technology in terms of safety and reliability, and increased construction volume in high-demand fields such as steel structures, curtain walls, and power and communication due to expanded infrastructure investment. At the same time, the pursuit of work efficiency and reduced labor intensity by professional construction teams has further promoted the widespread application of such self-powered fastening tools in engineering projects.

This report studies the global Gas Nail Gun production, demand, key manufacturers, and key regions.
