According to our (Global Info Research) latest study, the global Gas Non Return Valve market size was valued at US\$ 816 million in 2024 and is forecast to a readjusted size of USD 1232 million by 2031 with a CAGR of 6.1% during review period.

Gas Non Return Valve is an automatic valve used to control the one-way flow of gas and prevent gas backflow. It automatically opens and closes the valve disc through the flow of the medium itself, ensuring that the gas can only flow in one direction, thereby preventing counterflow or backflow. This valve is widely used in industrial and commercial fields, such as gas pipelines, heat treatment equipment, biogas devices, etc., to ensure the safety and reliability of the system.
