The global Gas Shielded Flux Cored Arc Welding Wires market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Gas-shielded flux-cored arc welding (FCAW) wires are a type of welding consumable used in welding processes that employ a continuous wire electrode and an external shielding gas to protect the weld from atmospheric contamination. These wires have a tubular design with a core of flux material that releases gases and deoxidizers when melted, while an external shielding gas is used to further protect the weld. Gas-shielded FCAW wires are commonly used in various welding applications, including structural steel, heavy equipment, and shipbuilding.
