According to our (Global Info Research) latest study, the global Gas Spring market size was valued at USD 2198.9 million in 2023 and is forecast to a readjusted size of USD 2916 million by 2030 with a CAGR of 4.1% during review period.

A gas spring is a type of spring that, unlike a typical mechanical spring that relies on elastic deformation, uses compressed gas contained within an enclosed cylinder sealed by a sliding piston to pneumatically store potential energy and withstand external force applied parallel to the direction of the piston shaft. Common applications include automobiles (where they are incorporated into the design of struts that support the weight of the hatchback tailgate while they are open) and office chairs. They are also used in furniture, medical and aerospace applications. Much larger gas springs are found in machines that are used in industrial manufacturing (the press tooling industry), where the forces they are required to exert often range from 2500N to 400,000N (forty tonnes).

Global Gas Spring key players include Stabilus, Suspa, Lant, Bansbach, WDF, etc. Global top five manufacturers hold a share about 40%. Europe is the largest market, with a share about 45%, followed by United States and China, both with a share about 20 percent. In terms of product, Lockable Gas Spring is the largest segment, with a share about 20%. And in terms of application, the largest application is Automotive, followed by Furniture, Industrial, Aerospace and Medical.
