According to our (Global Info Research) latest study, the global Gas to Liquids market size was valued at USD 58 million in 2023 and is forecast to a readjusted size of USD 71 million by 2030 with a CAGR of 3.1% during review period.

Gas to liquids (GTL) is a refinery process to convert natural gas or other gaseous hydrocarbons into longer-chain hydrocarbons such as gasoline or diesel fuel. Methane-rich gases are converted into liquid synthetic fuels either via direct conversion using the new GasTechno® non-catalytic gas-to-liquids process that converts methane to methanol in one step. Or via syngas as an intermediate, for example using the Fischer Tropsch or Mobil processes.

GTL Diesel accounts for more than 68% of the market, and the market share has not changed a lot. GTL Naphtha is much fewer than GTL Diesel.

The Global Info Research report includes an overview of the development of the Gas to Liquids industry chain, the market status of Small-scale plant (Fischer-Tropsch process, Syngas to gasoline process), Large-scale plant (Fischer-Tropsch process, Syngas to gasoline process), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Gas to Liquids.
