Abstracts

The global Gastroduodenal Stent market size is expected to reach $ 188 million by 2032, rising at a market growth of 4.9% CAGR during the forecast period (2026-2032).

In 2025, global gastroduodenal stent sales volume was approximately 145.5 thousand sets, with an average selling price of about US$900 per set. Each set typically consists of one self-expanding stent and a dedicated single-use delivery system. A gastroduodenal stent is a luminal implant placed under endoscopic and imaging guidance across a stenotic segment of the gastric outlet, pylorus, or duodenum. It is generally constructed from a nitinol mesh with shape-memory properties and sustained radial force and may be designed in uncovered, partially covered, or fully covered configurations. After deployment, the stent expands to support the narrowed digestive tract, relieve obstruction caused by tumor growth, external compression, or local stenosis, and restore the passage of gastric contents and oral food intake. This topic focuses on gastroduodenal stent systems used for the palliative treatment of malignant gastric outlet, pyloric, and duodenal obstruction, primarily in hospital gastrointestinal endoscopy centers, oncology centers, and interventional treatment departments.

Market growth is primarily driven by the rising number of patients with pancreatic cancer, gastric cancer, and other periampullary malignancies, together with increasing treatment demand associated with population aging. Compared with surgical gastrojejunostomy, endoscopic stent placement is less invasive and generally enables faster recovery, making it particularly suitable for patients with advanced cancer, poor general condition, or limited life expectancy. Continued improvements in through-the-scope delivery, low-profile delivery systems, controlled release, and repositionability are also enhancing procedural success and ease of use. In addition, expanding gastrointestinal endoscopy capacity in emerging markets and increased supply from

manufacturers in China, South Korea, and India are supporting broader product availability and higher treatment penetration.

Report Scope

This report studies the global Gastroduodenal Stent production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Gastroduodenal Stent and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Gastroduodenal Stent that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Gastroduodenal Stent total production and demand, 2021-2032, (K Sets)

Global Gastroduodenal Stent total production value, 2021-2032, (USD Million)

Global Gastroduodenal Stent production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Sets), (based on production site)

Global Gastroduodenal Stent consumption by region & country, CAGR, 2021-2032 & (K Sets)

U.S. VS China: Gastroduodenal Stent domestic production, consumption, key domestic manufacturers and share

Global Gastroduodenal Stent production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Sets)

Global Gastroduodenal Stent production by Type, production, value, CAGR, 2021-2032, (USD Million) & (K Sets)

Global Gastroduodenal Stent production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Sets)

This report profiles key players in the global Gastroduodenal Stent market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Boston Scientific Corporation, Cook Medical LLC, Taewoong Medical Co., Ltd., M.I.Tech Co., Ltd., S&G Biotech Inc., Standard Sci-Tech Inc., Mediwood Co., Ltd., SB-KAWASUMI Co., Ltd., Japan Lifeline Co., Ltd., bess pro gmbh, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Gastroduodenal Stent market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), volume (production, consumption) & (K Sets) and average price (US$/Set) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
