The global Gastrointestinal Pathogen Testing Kits market size is expected to reach \$ 6423.7 million by 2029, rising at a market growth of 3.9% CAGR during the forecast period (2023-2029).

With the rising prevalence of gastrointestinal diseases across the globe, the trend of gastrointestinal pathogen detection kits is also increasing. These test kits are designed to diagnose and detect the presence of bacterial, viral and parasitic pathogens that can cause serious gastrointestinal infections. Growing demand for accurate and rapid diagnostic tests for gastrointestinal disorders is driving the growth of the gastrointestinal pathogens detection kits market. Furthermore, technological advancements in the detection of gastrointestinal pathogens, such as the development of multiplex PCR-based assays, are driving this trend. Such assays increase detection efficiency, increase detection speed, and facilitate high-throughput testing, thereby expanding the market. In addition, the COVID-19 pandemic has further amplified the importance of gastrointestinal pathogen detection kits, as gastrointestinal symptoms have been observed as one of the common symptoms of COVID-19. Demand for these tests has surged as clinicians rush to identify and isolate infected people. In conclusion, the trend of detection kits for gastrointestinal pathogens is increasing due to rising prevalence of gastrointestinal diseases, technological advancements, and the COVID-19 pandemic. Demand for these tests has surged as clinicians rush to identify and isolate infected people. In conclusion, the trend of detection kits for gastrointestinal pathogens is increasing due to rising prevalence of gastrointestinal diseases, technological advancements, and the COVID-19 pandemic.

Gastrointestinal pathogen detection kits are diagnostic tools used to identify pathogens that cause gastrointestinal infections. These kits are essential for the rapid and accurate

diagnosis of gastrointestinal infections, which can be caused by a variety of bacterial, viral and parasitic pathogens.
