Abstracts

The global Gear Skiving Machine market size is expected to reach \$ 274.5 million by 2029, rising at a market growth of 2.7% CAGR during the forecast period (2023-2029).

Global key players of gear skiving machine include Liebherr, JTEKT, Gleason, NACHI-FUJIKOSHI, FFG Werke, etc. The top five players hold a share about 67%. Europe is the largest producer, has a share about 38%, followed by Japan and North America, with share 36% and 16%, respectively. The largest market is Asia-Pacific, with a share about 56%, followed by Europe and North America, with share 21% and 14%, separately.

Gear skiving is a continuous machining process where the tool meshes with the gear being made — similar to the way a pinion and gear mesh in a gear train. Gear Skiving Machine enables gear machining on one machine, instead of multiple machines including specialized machines as in the conventional way.

This report studies the global Gear Skiving Machine production, demand, key manufacturers, and key regions.
