Abstracts

The global Geared Head Drill Presses market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Geared head drill presses are designed for drilling larger holes than belt driven machines. They are usually capable of lower spindle speeds and almost always have power quill feed. This drill utilizes the combination of steel and reinforced fiber gears to ensure positive, quiet operation. All clutches are made of ground steel for added performance and strength. The wide speed range makes this drill ideal for drilling small to large diameter holes fast and easily.
