Abstracts

According to our (Global Info Research) latest study, the global Geared Motors market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The central role in the gearmotor is performed by the gear unit and its gear unit stages, the gear pairs. These features transmit the force of the motor from the input end to the output end. The gear unit therefore functions as a converter of speed and torque. In most application cases, the gear unit slows down the rotational speed of the motor while at the same time transmitting significantly higher torques than the electric motor alone could provide. With that in mind, the design of the gear unit determines whether a gearmotor is suitable for light, medium or heavy loads and for short or long power-applied hours.

In Sub-Saharan, Geared Motors key players include Sew-Eurodrive, Sumitomo, ABB, etc. Global top three manufacturers hold a share nearly 50%.

Nigeria is the largest market in Sub-Saharan, with a share about 20%, followed by Kenya, and Angola, both have a share over 10 percent.
