## Abstracts

The global General Industry Paint market size is expected to reach \$ 56130 million by 2029, rising at a market growth of 2.4% CAGR during the forecast period (2023-2029).

Industrial paint extend the lifespan of equipment, structures, and products by protecting them from environmental factors, wear and tear, and chemical exposure. This leads to cost savings and reduced maintenance requirements. Governments and regulatory bodies worldwide have been implementing stricter environmental regulations, particularly concerning the emission of volatile organic compounds (VOCs) and hazardous substances in coatings. Compliance with these regulations has become a significant driver for the adoption of sustainable coatings. The Asia-Pacific region witnessed robust growth in the coatings market due to rapid industrialization, urbanization, and increasing construction activities in countries like China, India, and Southeast Asian nations.
