Abstracts

According to our (Global Info Research) latest study, the global General Purpose Contactor market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

General purpose contactors are designed for a broad range of applications and must be able to switch higher currents. It will have larger contact heads (to lower resistance) and wider gaps between contacts (to limit damage from arcing) than a definite purpose contactor. These features, plus other design characteristics of general purpose contactors, give them a longer operating lifetime than cheaper definite purpose contactor options. Aside from the higher cost, there is no drawback in using general purpose contactors for HVACR applications. In fact, general purpose contactors will most likely outlast any HVACR equipment they are installed in.

The Global Info Research report includes an overview of the development of the General Purpose Contactor industry chain, the market status of Power Switching Application (DC Contactor, AC Contactor), Motor Application (DC Contactor, AC Contactor), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of General Purpose Contactor.
