## Abstracts

According to our (Global Info Research) latest study, the global General Purpose Poly Methyl Methacrylate (PMMA) market size was valued at USD 2999.4 million in 2022 and is forecast to a readjusted size of USD 3632.9 million by 2029 with a CAGR of 2.8% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Globally, Rohm, Trinseo, Mitsubishi Chemical and Sumitomo Chemical are the major players in the global market, and PMMA has a high market concentration. In recent years, as the profits of the PMMA industry have declined, some leading companies have divested their PMMA businesses. Globally, Rohm is the global market leader with a global market share of 22%.

China remains as the world's largest consumer of PMMA. However, consumption growth has slowed in recent years as the country's downstream industry continues to mature. The supply has also been significantly affected by the ban on plastic scrap imports, which resulted in a sharp decrease in production via recycled PMMA scrap. In China, PMMA use is dominant in construction (lighting fixtures, sanitaryware, and glazing) and automotive applications, while electrical/electronics use (liquid crystal displays, LED flat panel televisions, and notebooks) is the most significant market in most of the other countries in Asia.

General purpose grade of PMMA is largely divided into extrusion and injection purpose. Various pellet type of grades fit for the properties of customer products are available. It is important to select a grade that fits the design of the product. Refer to the following product characteristics for detailed information. Please contact customer service for

more information. Injection grade consists of products with flowability. It is important to select a grade appropriate for products being produced. Since conditions of molding can differ according to specifications of injection molding machine, shape of product and mold structure, it is very important to choose proper molding conditions.
