Abstracts

The generation, transmission, and distribution industry includes establishments involved in generating, transmitting, and distributing electric power. Companies in this industry operate generation facilities that produce electricity, transmission systems that convey electricity from generation facility to the distribution system, and distribution systems that convey electric power received from the generation facility or the transmission system to the final consumer.

Scope of the Report:

Utility business models are continuously evolving from traditional electricity generation models to new business models such as distributed generation models to cut costs and improve transmission and distribution efficiencies. Distributed generation refers to localized power generation using solar panels and other low-cost technologies to produce electricity close to the point of consumption. Consumers are switching to more cost-effective and controlled distributed generation networks, therefore electric power generation companies should now focus on distributed generation rather than a centralized electricity generation model. Also, many companies are using new revenue models and incentives instead of traditional cost-of-service models.

The global Generation, Transmission, and Distribution market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Generation, Transmission, and Distribution.

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.

This report studies the Generation, Transmission, and Distribution market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Generation, Transmission, and Distribution market by product type and applications/end industries.
