Abstracts

The global Generative Pre-trained Transformer (GPT) market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Generative pre-trained transformers (GPT) are a type of large language model (LLM) and a prominent framework for generative artificial intelligence.[4][5] The first GPT was introduced in 2018 by the American artificial intelligence (AI) company OpenAI. GPT models are artificial neural networks that are based on the transformer architecture, pre-trained on large data sets of unlabelled text, and able to generate novel human-like content. As of 2023, most LLMs have these characteristics and are sometimes referred to broadly as GPTs.

This report studies the global Generative Pre-trained Transformer (GPT) demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Generative Pre-trained Transformer (GPT), and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Generative Pre-trained Transformer (GPT) that contribute to its increasing demand across many markets.
