In 2014, the US DoD issued its energy policy directive. The guidelines were designed to enable advances in energy security, mitigate costs, and improve military capabilities through continuous improvements in energy consumption in the coming years. The directive also focuses on enhanced efforts and initiatives to improve the overall mobile power and operational energy needs of the military.

The Americas dominated the market, accounting for more than 56% of the market share. In the Americas, the US has the largest as well as the strongest defense sector. The US DoD is a significant consumer of electric power, much higher than the defense
