Abstracts

A genset (generator set) is used to power the reefer container when normal shore power is not available. E.g. when trucking over long distances or when chilled or sensitive cargo is being moved. The majority of the gensets are clipped on to the upper front of the reefer container (clip-on genset). Another type of genset can be attached to the standard chassis frame (underslung genset).

Scope of the Report:

This report focuses on the Gensets in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
