## Abstracts

According to our (Global Info Research) latest study, the global GFCI Controller market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

A GFCI (Ground Fault Current Interrupter) controller is a device used to monitor and protect against ground fault current in an electrical circuit. It detects the difference in current by comparing it to the ground wire in the circuit. When a current leakage (such as electric shock to the human body) is detected, the controller will quickly cut off the circuit to reduce the potential risk of electric shock.
