## **Abstracts**

According to our (Global Info Research) latest study, the global Gigabit PoE Splitter market size was valued at US\$ 647 million in 2024 and is forecast to a readjusted size of USD 866 million by 2031 with a CAGR of 4.3% during review period.

The Gigabit PoE (Power over Ethernet) Splitter market has witnessed significant growth and adoption in various industries that rely on Power over Ethernet technology for efficient and simplified network connectivity. A Gigabit PoE Splitter is a specialized device designed to split the power and data signals from a PoE-enabled Ethernet cable, allowing non-PoE devices to receive power and data simultaneously. This market's expansion is primarily driven by the increasing demand for PoE solutions in networking applications, security systems, IP cameras, access points, and other IoT devices, where running separate power lines can be cumbersome and costly.

The Gigabit PoE Splitter market addresses the need to power and connect non-PoE devices, such as IP phones, network switches, and wireless routers, to existing PoE networks. These splitters offer a cost-effective and convenient way to expand PoE network capabilities while reducing cable clutter and installation complexity.

Furthermore, as industries adopt more power-hungry devices and high-speed data applications, the demand for Gigabit PoE Splitters has surged. These splitters are capable of delivering higher power levels and supporting Gigabit Ethernet speeds, meeting the requirements of modern network deployments.

The market is characterized by the presence of several networking equipment manufacturers and technology providers offering a diverse range of Gigabit PoE

Splitters to cater to different power requirements and networking setups. Ongoing advancements in PoE technology, such as support for the latest PoE standards and improved efficiency, have further fueled the market's growth and facilitated the integration of PoE solutions in various network infrastructures.

As industries continue to embrace PoE technology for its flexibility and cost-effectiveness, the Gigabit PoE Splitter market is expected to witness sustained growth, serving as a critical enabler of seamless network connectivity and power delivery for a wide range of devices and applications. Additionally, the market's expansion is also driven by the growing recognition of the importance of PoE in enabling IoT deployments, smart building initiatives, and other connected solutions that require both power and data transmission over a single Ethernet cable.
