Abstracts

GigE cameras are based on the GigE vision interface standard developed for cameras that transmit images over gigabit Ethernet, and are used in applications that require multiple cameras, fast data transfer rates, or long cable lengths. GigE Cameras are imaging cameras that have been designed to interface with computer systems using GigE ports. GigE Cameras feature fast data transfer rates up to 1000Mb/s making them suitable for many demanding imaging applications. GigE Cameras may additionally be used in a number of locations far from a dedicated computer because of the long cable length allowed by GigE technology.
