Abstracts

The global Ginseng Extract market size is expected to reach \$ 48.21 million by 2032, rising at a market growth of 2.7% CAGR during the forecast period (2026-2032).

Ginseng is a plant characterized by a fleshy root and a single stalk with green oval-shaped leaves. It is a perennial plant that can live more than a century. Ginseng is typically derived from the root of this plant. As an herbal supplement, the extract has long been prized for its reputation of having anti-inflammatory, anti-cancer, and antioxidant properties. It is also used in the homeopathic treatment of conditions, including depression, stress, low libido, and Attention Deficit Hyperactivity Disorder (ADHD).

Studies have shown that Ginseng can improve balance, help prevent diabetes, cure anemia, and strengthen the gastrointestinal system. Research in Asia has also shown that it can benefit people who have coughs, asthma, and tuberculosis. Both the physical and mental effects of stress have been improved with the use of ginseng. It was even found to decrease the effects of alcohol intake and subsequent hangovers.

Ginseng is a common ingredient in energy drinks, ginseng tea, and diet aids. Other related products include chewing gum, candy, deodorant, and hair gel. Products that contain Siberian ginseng, also called eleuthero, may be misleading as this particular herb is technically a different plant. Although the benefits of Siberian Ginseng are similar to that of ginseng, the plant has a woody root that is unlike the fleshy root of a true ginseng species.

This report mainly focus on Ginseng Extract Product.

In the European market, Major producers include Boots, Orkla Health, Pharmaton, Allcura Naturheilmittel GmbH, Ginsana, Nature Essential, Oxford Vitality, Ortis, Vitastore, Elemis, Molinari and Erborian.
