## Abstracts

The global Glass Fiber Powder market size is expected to reach \$ 1240 million by 2032, rising at a market growth of 5.3% CAGR during the forecast period (2026-2032).

Glass fiber powder is a fine powder material obtained by crushing and grinding continuous or chopped glass fibers. Due to its excellent mechanical strength, thermal stability, chemical resistance, and lightweight properties, glass fiber powder is widely used as a reinforcing filler in composite materials. Compared with traditional mineral fillers, glass fiber powder can significantly improve the dimensional stability, rigidity, and wear resistance of polymer and resin systems. Glass fiber powder is widely used in industries such as plastics, thermosetting resins, coatings, adhesives, building materials, friction materials, and electronic components, especially in the field of engineering plastics, where it can significantly improve the structural strength and durability of materials. The upstream of the glass fiber powder industry chain includes raw material suppliers for glass fiber production, such as mineral materials like quartz sand, limestone, and alumina; the midstream consists of glass fiber powder manufacturers, who produce products with different particle sizes and properties through processes such as crushing, grinding, grading, and surface treatment; downstream application industries include plastic modification companies, coating manufacturers, adhesive manufacturers, building material companies, and automotive parts manufacturers, which use glass fiber powder in various composite material systems to improve product performance. In 2025, global glass fiber powder production is estimated at approximately 605,000 tons, with an average market price of approximately US\$1,350 per ton. The gross profit margin for glass fiber powder manufacturers typically ranges from 18% to 30%. Global glass fiber powder production capacity is projected to reach approximately 760,000 tons in 2025.

This report studies the global Glass Fiber Powder production, demand, key manufacturers, and key regions.
