Abstracts

This report focus on Glass Movable Walls market. Movable walls (also referred to as unitized walls) are built completely off-site at the manufacturer's facility. This lends itself to better quality control and a more uniform wall product. There are some main parts that need to be installed on-site: ceiling and floor channels to hold the walls in place; the actual wall panels and doors; trim and finishing; and power and data components. This allows the movable walls to be installed and relocated very quickly.
