Glass safety window film is a type of window film that is designed to increase the safety and security of glass windows. It is a thin, transparent film that is applied to the surface of the glass to help hold the glass together in the event of breakage. This can help prevent injuries from sharp glass shards in case of accidents, vandalism, or forced entry.

Glass safety window film can also help increase the resistance of windows to break-ins, as it makes it more difficult for intruders to break through the glass. Additionally, it can provide protection against UV rays, reduce glare, and improve energy efficiency.
