Abstracts

The global Glass Skylight market size is expected to reach \$ 1921.9 million by 2029, rising at a market growth of 4.1% CAGR during the forecast period (2023-2029).

A glass skylight is a type of window that is installed in a roof or ceiling to allow natural light to enter a building. They are often made of tempered or laminated glass, which is designed to be strong and durable enough to withstand the elements.

Glass skylights come in a variety of styles and designs, including fixed, vented, and tubular models. Fixed skylights are stationary and do not open, while vented skylights can be opened to allow for ventilation. Tubular skylights are smaller and typically used in areas where a larger skylight would not fit.
