According to our (Global Info Research) latest study, the global Glass Wool Insulation Material market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Glass Wool Insulation Material is a kind of glass wool; it is a high-tech product, mainly made from sand and recycled glass. Its exceptional thermal properties contribute to save energy and combat climate change. Its porous and elastic structure absorbs noise in the air and offers acoustic correction inside premises.

Glass wool Insulation is one of the most widely used forms of insulations world-wide because of its thermal and acoustic properties, light weight, high tensile strength and exceptional resilience. Glass wool is one of the most dominant types of insulations preferred in applications with service temperatures ranging up to 250C.

Glass wool insulation material is formed into products with various thickness and densities. It comes in the form of rolls and slabs with or without Aluminum foil Paper.

In the U.S. market, major producers include Owens Corning, Johns Manville, Saint-Gobain, Kauf, Atlas Roofing, PPG Industries and DBW Advanced Fiber Technologies.
