Abstracts

According to our (Global Info Research) latest study, the global Glassfibre Reinforced Concrete market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Glassfibre Reinforced Concrete (GRC) is a type of fiber-reinforced concrete. Glass fiber concretes are mainly used in exterior building facade panels and as architectural precast concrete. Somewhat similar materials are fiber cement siding and cement boards. Glassfibre Reinforced Concrete consists of high-strength, alkali-resistant glass fiber embedded in a concrete matrix.

The commercial construction application is projected to lead the GRC market during the forecast period, in terms of value and volume. The growth of the commercial construction application can be attributed to the increasing use of GRC in buildings, such as offices, institutes, hospitals, gymnasiums, cinema theatres, museums, and auditoriums.
