Abstracts

Glucose is a sugar with the molecular formula $C_6H_{12}O_6$. Dextrose is also a simple sugar. It is an isomer of glucose, D-glucose. Maltodextrin consists of D-glucose units connected in chains of variable length. The glucose units are primarily linked with $\alpha(1\rightarrow4)$ glycosidic bonds. Maltodextrin is typically composed of a mixture of chains that vary from three to 17 glucose units long.

Scope of the Report:

This report focuses on the Glucose, Dextrose, and Maltodextrin in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The technical barriers of Glucose, Dextrose and Maltodextrin are relatively low, which leads to a relatively low market concentrated rate.

In 2016, consumption in food and beverages occupies more than half of Glucose, Dextrose and Maltodextrin amount. Glucose, Dextrose and Maltodextrin products are distributed by a number of methods, which we believe are appropriate to the type of product. Usually, domestic sales are made through branch sales offices, distributors and dealers across the country. International sales are made through numerous subsidiary sales and service companies with a supporting chain of distributors throughout the world. Glucose, Dextrose and Maltodextrin are produced from plant-based raw materials such as corn, wheat, potatoes and peas. In the past few years, the global average price of Glucose, Dextrose and Maltodextrin products gradually decreased with the decreasing trend of raw material prices. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play

a significant role in promoting the cost of Glucose, Dextrose and Maltodextrin. Therefore, to some extent, the companies may face the risk of profit decline. The principal methods of competition in these markets relate to price, quality, delivery, service and support, technology and innovation. Manufacturers located in India, China and Taiwan are also becoming more significant competitors as the products produced in these regions improve in quality and reliability. There are companies adding new capacities and aims at the cost and quality leadership which shall improve profitability. At the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. The worldwide market for Glucose, Dextrose, and Maltodextrin is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
