Abstracts

Glycoproteins are proteins that contain oligosaccharide chains (glycans) covalently attached to polypeptide side-chains. The carbohydrate is attached to the protein in a cotranslational or posttranslational modification. This process is known as glycosylation. Secreted extracellular proteins are often glycosylated.

Scope of the Report:

This report focuses on the Glycoprotein in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. As international economic situation is complicated, in the next few years there will be many uncertainties. Due to the government' policy and the high consumption of Glycoprotein in the international market, the current demand for Glycoprotein product is relatively large in the mature market, such as North America and Europe, but in developing countries, the level of health care is very low.

Glycoprotein is mainly manufactured and sold by Sigma, Creative Diagnostics, R&D Systems, Enzo Life Sciences, Thermo Fisher Scientific, Epitope Diagnostics, BD Biosciences; and these companies occupied about 91.08% market share in 2016. Geographically, North America is the largest sales market in the world, which took about 51.88 percent of the global consumption volume in 2016.

The worldwide market for Glycoprotein is expected to grow at a CAGR of roughly 1.3% over the next five years, will reach 490 million US\$ in 2023, from 460 million US\$ in 2017, according to a new GIR (Global Info Research) study.
