## Abstracts

The global Glyoxylic Acid market size is expected to reach \$ 361 million by 2032, rising at a market growth of 4.8% CAGR during the forecast period (2026-2032).

Glyoxylic acid or oxoacetic acid is an organic compound that is both an aldehyde and a carboxylic acid. Glyoxylic acid is a liquid and is an intermediate of the glyoxylate cycle, which enables certain organisms to convert fatty acids into carbohydrates.

China is the largest producer of glyoxylic acid globally. On 25 July 2024, the European Union initiated an antidumping investigation on imports of certain glyoxylic acid from China. The products subject to investigation are classified under HS code subheading 2918.30.00. This investigation follows the application lodged on 10 June 2024 by WeylChem Lamotte SAS on behalf of the Union industry. The investigation is still in progress now.

Glyoxylic acid is widely used in personal care products, particularly for hair smoothing and anti-frizz treatments. With the growing emphasis on personal grooming and beauty products, the demand for glyoxylic acid in hair care formulations is on the rise. Glyoxylic acid is also a key intermediate in the synthesis of various pharmaceuticals, including antibiotics and cardiovascular drugs. The expanding pharmaceutical industry, driven by the aging population and increasing healthcare needs globally, is fueling demand for glyoxylic acid.

This report studies the global Glyoxylic Acid production, demand, key manufacturers, and key regions.
