## Abstracts

According to our (Global Info Research) latest study, the global Goat Leather market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Goat Leather, traditionally called Morocco leather, is known for its softness, light weight and strength. It is one of the most resilient leathers, as the leather is composed of a very dense weave of fibres of small diameter interspersed by numerous elastic fibres. This structure of the leather gives the hide a distinctive tight grainy texture with ridges, resembling to pebbles. The natural properties of the goat leather mean that it is water resistant, very supple and soft. This is due to the presence of lanolin, a waxy grease produced by the goat's skin.

In China's Goat Leather market, North China accounts for about 40% of China's market share, followed by East China for about 25%. In North China, there are a large number of enterprise branches in Xinji City, Hebei Province (near Shijiazhuang); Haining is an important leather producing area in East China; Henan Province plays an important role in central and southern China. Fusheng Fur Leather, Huzhou Dhatr, Zhejiang Jinxin, Xinxiang Heitian Mingliang, Henan Prosper Skins & Leather, Hebei Maidemu, etc. are the key suppliers in the Chinese Goat Leather market. Goat leather is mainly consumed at home and less exported. Due to more substitutes, such as cattle leather, sheep leather, pig leather, etc., the goat leather market development competition is fierce.
