Abstracts

The global Gold Jewelry market size is expected to reach \$ 71754 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032). Jewellery (British English) or jewelry (American English) consists of small decorative items worn for personal adornment, such as brooches, rings, necklaces, earrings, pendants, bracelets, and cufflinks. Jewellery may be attached to the body or the clothes, and the term is restricted to durable ornaments, excluding flowers for example. Gold jewelry is an ornament made primarily of gold through processes such as smelting, forging, carving, and setting. Common forms include rings, necklaces, bracelets, and earrings. Based on gold content, gold jewelry can be divided into several grades, including pure gold (?99%), 24K gold (?99.9%), and 18K gold (75% gold content), possessing excellent ductility, corrosion resistance, and value retention. The average price of this product is approximately US\$575 per piece, with global sales of approximately 240 million pieces.

Gold jewelry is not only an ornament but also a dual symbol of culture and wealth. In Eastern culture, it carries the meaning of auspiciousness, inheritance, and status; in the global market, it is an important asset for hedging against inflation and preserving and increasing value. With the innovation of design concepts and the transformation of consumption attitudes, gold jewelry is evolving from traditional heavy and hefty to light luxury and fashion. New techniques such as ancient gold craftsmanship, hard gold, and colored gold are constantly refreshing people's aesthetic perception of gold, giving it new vitality among younger consumers.

This report studies the global Gold Jewelry production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Gold Jewelry and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and
