## Abstracts

The global Gold Medal Full Module Power Supply market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Gold medal full-module power supplies usually refer to products with high energy efficiency levels in the power supply field. Among them, 'gold medal' often means that the power supply meets the energy efficiency certification standards, usually referring to the gold medal in the 80PLUS level, which represents relatively efficient energy utilization. On the other hand, 'fully modular' means that the power supply uses a modular design so that individual components, such as cables and connectors, are removable modules, providing greater flexibility and customizability. The modular design allows users to connect or remove modules based on actual needs for better cable management, improved air flow, and a cleaner power layout.
