Abstracts

Golf cart batteries are batteries that are specifically designed for golf carts. Golf cart batteries are basically deep cycle lead-acid batteries. However, Li-ion batteries for golf carts are gaining momentum in the market. Major golf cart vendors are switching from tradition deep cycle lead-acid to Li-ion batteries, owing to the higher energy density and lower power duration of the latter.

Scope of the Report:

This report focuses on the Golf Cart Battery in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Cost advantage of lead-acid batteries over other batteries is the key driver for the growth of this market. The lead-acid battery segment has been able to retain its market share in golf cart applications due to the high price of Li-ion batteries. Additionally, lead-acid batteries offer high cranking current that is ideal for starting lighting and ignition (SLI) applications in gasoline golf carts. Technological segmentation and analysis of: lead acid & Li-ion

The worldwide market for Golf Cart Battery is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
