Abstracts

A golf course green hole cutter is a specialized tool used in golf course maintenance to create or change the holes on putting greens. It consists of a cylindrical metal tube with a sharp cutting edge at the bottom and handles for manual operation. All holecutters are engineered with an indicator to ensure the correct cut depth is achieved.

Groundskeepers use golf hole cutters to precisely remove plugs of turf from the putting green, allowing for the relocation of the golf hole. This tool ensures that the hole diameter and depth comply with standard regulations, providing consistency across the golf course.
