Abstracts

The global Golf Shaft market size is expected to reach \$ 721 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

The shaft of a golf club is the long, tapered tube which connects the golfer's hands to the club head. While hundreds of different designs exist, the primary purpose of the golf shaft remains the same: to provide the player with a way to generate centrifugal force in order to effectively strike the ball. When properly gripped the player can hit the ball further and more accurately, whilst applying less force.

Global key players of golf shaft include True Temper, Mitsubishi, Nippon Shaft, Paderson Shafts and Fujikura, etc. Top 3 players occupy for a share about 30%. North America is the largest market, with a share about 55%, followed by Asia-Pacific and Europe. In terms of material, iron golf shaft is the largest segment, with a share over 40%. In terms of application, male golf shaft is the largest market, with a share over 70%.

This report studies the global Golf Shaft production, demand, key manufacturers, and key regions.
