Abstracts

Gourmet salt is crystallized from current bodies of seawater, either by open-air solar evaporation or by quick vacuum evaporation process. Gourmet salts are used in cuisines that demand extravagance and appeal; gourmet cooks use these salts as seasoning and dressing. They are used as enhancers of texture, appeal, and taste, as against simple blending with food, giving an everyday-flavor. These salts have a better solubility, exotic flavor, moisture, and higher mineral content. They are used in cooking and food preservation. Scope of the Report:

This report focuses on the Gourmet Salt in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
