Abstracts

According to our (Global Info Research) latest study, the global GP681 market size was valued at US\$ 36.01 million in 2025 and is forecast to a readjusted size of US\$ 195 million by 2032 with a CAGR of 7.9% during review period.

GP681 is a novel oral antiviral drug targeting influenza viruses, belonging to the class of cap²-dependent endonuclease inhibitors. It blocks the function of the polymerase acidic protein of influenza viruses, thereby inhibiting viral nucleic acid replication and transcription and rapidly controlling the infection process.

The drug features single²-dose administration, rapid onset of action, and low incidence of drug resistance. It exhibits potent inhibitory activity against both influenza A and B viruses, and is clinically indicated for the treatment of influenza A and B in people aged 12 years and older.

With high safety and convenient administration, GP681 represents a typical domestically developed innovative anti²-influenza drug, providing a new option for clinical influenza treatment. In 2025, global GP681 production reached approximately 1.2 million bottles

GP681 (Suraxavir) is China's first domestically developed innovative anti-influenza drug targeting the PA protein. With its differentiated advantages of single-dose administration, rapid onset of action and low drug resistance rate, it has entered the domestic anti-influenza drug market worth tens of billions of yuan, breaking the monopoly of foreign products targeting the same site.

Its clinical data are all derived from Chinese populations, providing evidence more

suitable for local patients. It demonstrates comparable efficacy and safety to international counterparts, with a significantly lower rate of drug resistance mutations, highlighting its prominent clinical value.

Currently dominated by oseltamivir and baloxavir, the market sees GP681 poised to rapidly penetrate hospital and retail channels and capture share in the PA inhibitor segment, backed by its status as a domestic innovative drug, pricing advantages and expected inclusion in medical insurance.

Meanwhile, the developer is expanding indications for children and high-risk populations and promoting overseas layout, further unlocking market potential and establishing GP681 as a representative breakthrough for domestic innovative drugs in the respiratory field.
