Abstracts

According to our (Global Info Research) latest study, the global Grab Hire Service market size was valued at US\$ 338 million in 2025 and is forecast to a readjusted size of US\$ 493 million by 2032 with a CAGR of 5.3% during review period.

Grab hire service is a type of waste management service that involves the use of specialized vehicles equipped with a large hydraulic arm, for the collection and transport of materials. This service is particularly useful for projects that generate large volumes of waste or where access is limited, as the grab arm can reach into tight spaces and load materials directly into the lorry without the need for manual handling. This reduces the time and effort required for waste removal and can be more cost-effective than other waste collection methods. These service is commonly used in construction sites, landscaping projects, house clearances, and other situations where bulk waste removal is required.

The market is undergoing a profound transformation towards specialization and intelligence, with equipment technology upgrades and scenario adaptation capabilities becoming core competitive factors. On the one hand, the demand for customized grab bucket rentals for different operational scenarios is rapidly increasing, such as heavy-duty grab buckets for port bulk cargo handling, hydraulic grab buckets for construction waste processing, and wear-resistant grab buckets for mining. Rental companies are meeting customers' differentiated operational needs by optimizing equipment selection and modification services. On the other hand, intelligent technologies are rapidly penetrating the market, with intelligent grab buckets equipped with sensors and positioning systems gradually becoming the mainstream rental solution. These grab buckets can monitor equipment status, operational efficiency, and wear levels in real time, helping customers achieve refined construction management while reducing

equipment maintenance costs and risks for rental companies.

The market structure is showing characteristics of intensive and integrated service development, with the industry shifting from single equipment rental to a full-chain service model of 'equipment + technology + operation and maintenance.' Leading rental companies are integrating upstream and downstream resources to build standardized equipment warehousing, transportation, and maintenance systems, improving cross-regional dispatch capabilities to meet the large-scale equipment needs of large-scale engineering projects. Simultaneously, service boundaries are continuously expanding, adding value-added services such as operator training, construction plan optimization, and equipment failure emergency response to strengthen customer loyalty. Furthermore, driven by green and low-carbon policies, the demand for lightweight and energy-saving grabs is rising, and rental companies with environmentally friendly equipment and supporting services will have a competitive advantage.

This report is a detailed and comprehensive analysis for global Grab Hire Service market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Grab Hire Service market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Grab Hire Service market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Grab Hire Service market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2021-2032

Global Grab Hire Service market shares of main players, in revenue (\$ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Grab Hire Service

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Grab Hire Service market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Willshee, Camiers, Geno Group, Waste King, LG Grab Hire, B&A Group, Taurus Waste Recycling, Mick George Group, Chambers Waste Management, Heidelberg Materials, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market segmentation

Grab Hire Service market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.
