## Abstracts

Grape seed oil (also called grapeseed oil or grape oil, abbreviation: GSO) is pressed from the seeds of grapes, and is thus an abundant by-product of winemaking. Grape seed oil is low in saturated fats and high in polyunsaturated fats making it a healthy choice for the heart and cardiovascular system. Grape seed oil is an excellent source of linoleic acid, an omega-6 essential fatty acid that cannot be synthesized by the human body but is a nutritional necessity for healthy development and growth. Grape seed oil is a pale to yellow usually semidrying fatty oil and is commonly used in cooking, cosmetics and health products etc.
