## Abstracts

According to our (Global Info Research) latest study, the global Graphite Felts market size was valued at USD 113.2 million in 2023 and is forecast to a readjusted size of USD 227.5 million by 2030 with a CAGR of 10.5% during review period.

This report focus on Graphite Felts market. Graphite Felts (GFs) are widely used due to their electrochemical activity, high permeability for liquids, high surface area and relatively low cost.

Carbon and graphite felts find wide applications due to their properties such as high thermal insulation, broad operational range, chemical stability, and lightweight. APAC was the fastest-growing carbon felt and graphite felt market, in terms of value and volume. The increasing demand for carbon and graphite felts from the emerging economies and rising government spending on infrastructural projects are the main factors contributing to the market growth in APAC. The increasing demand for high-performance batteries and improved performance of carbon fiber in high temperature applications are driving the carbon felt and graphite felt market. The absence of quality control in developing economies is restraining the market growth.

The Global Info Research report includes an overview of the development of the Graphite Felts industry chain, the market status of Furnace (Rayon Based, PAN Based), Batteries (Rayon Based, PAN Based), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Graphite Felts.

Regionally, the report analyzes the Graphite Felts markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives

and increasing consumer awareness. Asia-Pacific, particularly China, leads the global Graphite Felts market, with robust domestic demand, supportive policies, and a strong manufacturing base.
