Abstracts

The global Graphite Films market size is expected to reach \$ 4620 million by 2032, rising at a market growth of 8.5% CAGR during the forecast period (2026-2032).

Graphite Films are thin, flexible graphite-based thermal management materials made from pyrolytic graphite, synthetic graphite, or compressed natural graphite. They provide high in-plane thermal conductivity, low thickness, flexibility, and good die-cutting processability, and are mainly used for heat spreading in smartphones, tablets, laptops, wearables, LED modules, power electronics, and automotive electronics. In 2025, Global Graphite Films sales are estimated at 9,500 million Sqm, with an average ex-works price of 0.28 US\$/Sq m. The industry chain of Graphite Films includes upstream polyimide films, natural flake graphite, adhesive films and release liners; midstream carbonization, graphitization, calendaring, lamination, die-cutting and adhesive processing; and downstream applications in consumer electronics, automotive electronics, LEDs, telecom equipment and power-device thermal management.

Demand for Graphite Films is driven by thinner electronic devices, higher chip power density and the integration of multiple heat sources in compact systems. Smartphones, foldable displays, AI PCs, tablets and wearables require lightweight heat spreaders that can distribute heat within very limited space, while automotive displays, cockpit electronics, ADAS controllers and power devices are creating additional demand beyond consumer electronics. As customers require better reliability, thickness uniformity and die-cutting yield, suppliers with high-conductivity base films, composite design capability and scalable converting capacity are better positioned.

This report studies the global Graphite Films production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Graphite Films and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
