According to our (Global Info Research) latest study, the global Graphitized High Purity Multi-walled Carbon Nanotubes market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Graphitized high purity multi-walled carbon nanotubes are usually created from standard multi-walled nanotubes by annealing at a temperature of 2800°C for approximately 20 hours under an inert gas atmosphere to achieve graphitization, thereby obtaining superior mechanical properties. With open ends, the graphitized multi-walled carbon nanotubes have the highest graphitic crystallinity, the best electrical conductivity, and the best oxidation resistance. Their electrical conductivity is similar to that of graphite powder, and the ignition temperature can reach up to 800°C.

Graphitized high purity multi-walled carbon nanotubes possess high electrical conductivity, high thermal conductivity, excellent mechanical properties, and chemical stability. With the continuous expansion of downstream application fields, the market demand for graphitized multi-walled carbon nanotubes is expected to keep growing. Especially in cutting-edge fields such as new energy vehicles, electronic information, and aerospace, the continuous advancement of technology and the demand for high-performance materials will drive their ongoing development. In the field of environmental protection, high-purity graphitized multi-walled carbon nanotubes can be used in

sewage treatment, waste gas treatment, etc. Their unique structure and properties can effectively adsorb and catalyze harmful substances, presenting broad application prospects. As the global emphasis on environmental protection continues to increase, the demand for environmental protection materials and technologies will continue to grow, which will also provide new opportunities for it.
